2020-2021 Partnership Report

Collaboration Highlights Jan. 2020-Jul. 2021

- Disseminated CDC messaging to ADCES network affiliates.
- Adapted CDC's Prevent T2 curriculum materials to low-literacy resources in Spanish.
- Identified and developed patient education materials needed to drive enrollment, enhance service delivery to priority populations, increase participant engagement, and advance achievement of diabetes program outcomes.
- Participated in bi-monthly Community of Practice (COP) calls focused on Increasing Awareness of Prediabetes and Enrollment to the Lifestyle Change Program and Increase Retention Rates for Participants in the Lifestyle Change Programs.
- Conducted focus group with Migrant Health Centers who are accredited Diabetes Prevention Program (DPP) providers with a focus on increasing access to diabetes prevention programming for special and vulnerable populations, including Migratory and Seasonal Agricultural Workers (MSAWs).
- Developed and provided workforce training focused on Improving Health Literacy for Better Outcomes and Cultural Competency Skills
- Developed and distributed a Diabetes Self-Management Education and Support (DSMES) and DPP Survey with health centers, which directed activities and technical assistance (TA) efforts.

Dissemination Metrics

	2020	2021
	28,636 E-digest Distributions	15, 767 E-digest Distributions
	6,112 Facebook Reach	5,120 Facebook Reach
	5,023 Twitter Reach	3,954 Twitter Reach
	681 Blog Reach	272 Blog Reach

2020 Metrics: Jan. - Sept. 2020

2021 Metrics: Nov.2020- Jul. 2021

Healthy Habits from Home
Want to lower your risk of type 2 diabetes and improve your health? Take action today!

The lifestyle change program can help you stay on track from the comfort of your living room and reduce your risk for type 2 diabetes.

Start a Healthy Lifestyle
Take small steps that will help you learn to eat healthier foods, increase your physical activity, manage stress, and find what motivates you.

Join a Virtual Community
You won't be on your own to make these changes. You'll receive a full year of support from a trained lifestyle coach and a group of people with similar goals and challenges.

Get Connected
Find support and learn from others in this interactive program through a cell phone, tablet/iPad, or web camera on your computer.

1 IN 3 ADULTS IN THE UNITED STATES HAS PREDIABETES.

Take a one-minute risk test at dolhaveprediabetes.org.

LET'S PLAY JEOPARDY!
A Step-By-Step Guide To Set Up Your Own Jeopardy Game With National DPP Participants For Session On "Keep Your Heart Healthy."

STEP 1:
Choose the # of teams you would like to create, then click "Start." If you would like to edit any of the questions,click on "edit," choose the category and $ amount you would like to edit. Make your changes and click "continue." Repeat until you have completed all of your changes. Click on the "save and finish" button at the top. Email the link to yourself and bookmark by adding to favorites using the menu bar for future use.

STEP 2:
If played virtually, have each participant or team choose a "reaction" by clicking on the "reaction" button found in zoom (or assign one if preferred). You may also choose to use different colored index cards or assign team names and have each team use the "raised hand" reaction. If a team would like to respond to a question presented, they will "buzz" in by following the chosen method of play as previously described. The team whose reaction emoticon appears first has a chance to respond and earn the amount of points assigned to that question. If they are incorrect, the other teams have a chance to respond. If played in person, you can use actual buzzers for each team or have them hold up different colored index cards.

STEP 3:
You will start the game by having any team choose a category and amount for that category. Ex: "I would like Healthy Eating for $300 please." As host, you will select the chosen category/amount and read that question or statement. (Tell participants to wait until you are done reading the question before clicking on their reaction emoticon or raising their card). The team to raise their reaction emoticon or card first has a chance to respond. If correct, click on "Space Bar" at the top to reveal the response and additional source information. Next, click on "ESC" at the top to return to game.

Welcome to NCFH's Diabetes Resource Hub! NCFH is working with a number of partners in a learning collaborative supported by HRSA to further the knowledge of health centers in developing and implementing certified Diabetes Self-Management Training (DSMT) and/or CDC-recognized Diabetes Prevention Program. This initiative assists community health centers with specific training needs and steps for implementation. Through our partnership with the Association of Diabetes Care and Education Specialists (ADCES), formerly known as the American Association of Diabetes Educators (AADE), we have gathered a select few resources and tools below to further this initiative in preventing, managing, and treating prediabetes and diabetes. ADCES Prevention Network offers additional information about their Prevention Network and the National Diabetes Prevention Program (DPP) led by the Centers for Disease Control and Prevention. ADCES also provides information about opportunities available to create your own Diabetes Prevention Program and host a LifeStyle Coach Training.
