

What Parents Should Know about COVID-19 Vaccines for Kids

COVID-19 vaccines for children ages 5 and up are:

Available!

Safe and effective!

Free!

After vaccination, some children may experience mild side effects for a few days.

These may include:

- Fatigue
- Headache
- Fever
- Muscle aches
- Pain at the site of injection
- Chills
- Nausea

Side effects after vaccination are normal and show that the body is building protection against the virus! Call your child's health care provider if you have any concerns about your child's symptoms.

Vaccinating children will help reduce their risk of getting very sick from COVID-19 while they play, go to school, and visit family.

Keep wearing masks and staying six feet apart from others even if you're vaccinated.

Are you a farmworker in the United States with questions about COVID-19 vaccines? Talk to your health care provider or call the **Call for Health** line at **1(800)377-9968** or **WhatsApp** at **1(737)414-5121**.
