

THE COVID-19 VACCINE

WHAT HAPPENS WHEN I GET IT?

Everyone has the right to get vaccinated!

Step

1

After getting the vaccine:

- It's possible that you'll feel fine, or that you will have pain in your arm, headache, fever, chills, nausea, muscle pain, or tiredness for 1-3 days.
- If you are going to move for work in the next few weeks, ask the clinic to write down the brand name of the vaccine.

Step

2

If you get a vaccine that requires two doses:

- You'll need to get the second dose 3-8 weeks after the first one.
- You should receive both doses to avoid getting very sick with COVID-19.

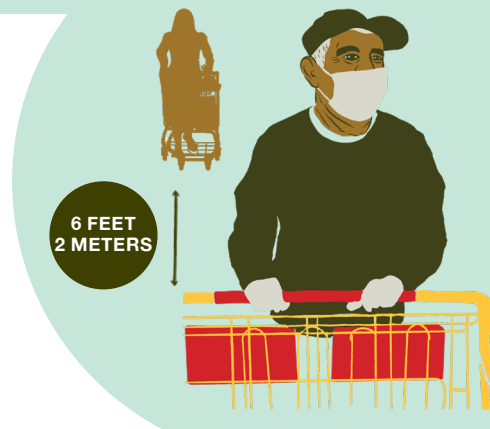

Step

3

After getting all the doses needed:

- **Get the booster shots** when you become eligible to have better protection against new variants.
- **Wear a mask** if you have had contact with anyone infected with COVID-19 or if there is a high risk of COVID-19 spread in your community.
- **Get tested for COVID-19** if you feel any symptoms (cough, fever, etc.).

Are you an agricultural worker in the United States
and want to know when and where you can get vaccinated?

Talk to your health care provider or call the Call for Health line at:

1 (800) 377-9968 or send us a message on Whatsapp: **+1 (737) 414-5121**
